This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.Start of repeated scenario.Your network contains an Active directory forest named adatum.com.All client computers run Windows 10 Enterprise, Semi-Annual Channel (Targeted). All the computers are named by using the name of their respective department and an incremental three-digit number. For example, the first computer in the sales department is named Sales001.

Several managers use tablets that run Windows 10 and have 3 GB of RAM. All other client computers have at least 8 GB RAM. Adatum.com is synchronized to Microsoft Azure Active Directory.Your company implements the Microsoft Store for Business.You have a deployment of System Center Configuration Manager (Current Branch) that has discovery configured. All the client computers have the Configuration Manager client installed.The company uses the applications shown in the following table. The

company identifies the following requirements for software deployments:- View the Upgrade Readiness data of all the client computers.- Deploy App1 to the client computers in the marketing department.- Deploy App2 to the client computer in the human resources (HR) department.- Monitor the usage of App3.- Deploy SalesAppLite to sales department computers that have 3 GB of RAM or less.- Deploy SalesAppFull to sales department computers that have more than 3 GB of RAM.You create a cloud-based distribution point that has a public name of d1594d4527614a09b934d470.End of repeated scenario.You need to meet the

requirements for the HR department computers.Which two actions should you perform? Each correct answer presents part of the solution.NOTE: Each correct selection is worth one point.A. Configure the Microsoft Operations Management Suite (OMS) connector.B. Add the Microsoft Store for Business service to the Configuration Manager Console.C. Create an application in Configuration Manager.D. Create an App-V package.E. Add a cloud management gateway.Answer: BCEExplanation:

<https://docs.microsoft.com/en-us/sccm/apps/deploy-use/manage-apps-from-the-windows-store-for-business>QUESTION 98

You have a deployment of System Center Configuration Manager (Current Branch).You use the deployment to manage client computers that run Windows 7.You need to deploy a Microsoft Application Virtualization (App-V) package to the computers by using Configuration Manager.What should you do first?A. Configure the Enable App-V Client setting by using a Group Policy object (GPO).B. Deploy the App-V client to the computers.C. Install the App-V Sequencer on a reference computer.D. From the Configuration Manager console, create an App-V virtual environment.Answer: BExplanation:

<https://docs.microsoft.com/en-us/sccm/apps/get-started/deploying-app-v-virtual-applications>QUESTION 99You have a

collection of devices that run an application named SaleApp1.Every week, the sales manager publishes an updated price list to a file share. To use the new price list, the list must be copied to the application folder on the devices.You need to ensure that SalesApp1 receives a new price list weekly.What should you configure?A. a weekly maintenance window for the target collectionB. a weekly schedule for the Update Application Available Targeting maintenance taskC. a weekly content validation schedule on the distribution pointD. a package that has a weekly recurrence scheduleAnswer: DExplanation:

<https://github.com/MicrosoftDocs/SCCMdocs/blob/master/sccm/apps/deploy-use/packages-and-programs.md>QUESTION 100You have a deployment of System Center Configuration Manager (Current Branch).You need to deploy an application to the users in the sales department.The deployment must meet the following requirements:- Install the application on client computers that have at least 5 GB of RAM.- Validate that the deployment of the application was successful.Which settings should you configure for the deployment?A. Detection Method and RequirementsB. Requirements and DependenciesC. Install Behavior and DependenciesD. Dependencies and User ExperienceE. User Experience and Detection MethodAnswer: AExplanation: <https://blogs.msdn.microsoft.com/scstr/2012/05/31/how-to-create-an-application-in-configuration-manager-2012/>QUESTION 101You have a deployment of System Center Configuration Manager (Current Branch).You plan to implement hybrid mobile device management (MDM).Which cloud service should you provision?A. Microsoft Operations Manager Suite (OMS)B. Microsoft Store for BusinessC. Microsoft IntuneD. Microsoft AzureAnswer: CExplanation: <https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/setup-hybrid-mdm>QUESTION 102You have a deployment of System Center Configuration Manager (Current Branch).You configure hybrid mobile device management (MDM).You have a bring-your-own-device (BYOD) policy. Users self-enroll their mobile phones.You plan to deploy a line-of-business app named App01 to Apple iOS devices. App01 can access private company data.You need to ensure that a PIN is entered when the users open App1.What should you configure?A. an application management policyB. a compliance policyC. a configuration baselineD. Client SettingsAnswer: AExplanation: <http://www.itprotoday.com/cloud-data-center/publish-corporate-applications-ios-using-configuration-manager-and-intune>QUESTION 103You have a deployment of System Center Configuration Manager (Current Branch).You configure hybrid mobile device management (MDM).You run WINVER on client computer named Computer1 as shown in the following exhibit. You need to create a compliance policy that has a condition specifying a minimum version of the operating system. The condition must use the same operating system version as Computer1.Which version should you specify in the condition?A. 10.0.16299.15B. 10.0.1709 C. 10.1709D. 10.1709.16299.15Answer: AExplanation: <https://docs.microsoft.com/en-us/intune/compliance-policy-create-windows>QUESTION 104You have a deployment of System Center Configuration Manager (Current Branch).You add the cloud management gateway connector point to the deployment.Which site system role can be configured to receive the traffic from the cloud management gateway?A. Service connection pointB. Distribution pointC. Management pointD. Endpoint Protection pointAnswer: CExplanation: <https://www.systemcenterdudes.com/how-to-setup-an-sccm-cloud-management-gateway/>QUESTION 105You have a deployment of System Center Configuration Manager (Current Branch).You configure discovery.You have a query that returns all devices without the Configuration Manager client installed. You create a collection that uses the query.You need to deploy the Configuration Manager client to the members of the collection only.Which deployment method should you use?A. a package deploymentB. a software update point-based installationC. a manual client push installationD. a Group Policy installationAnswer: CExplanation: <https://docs.microsoft.com/en-us/sccm/core/clients/deploy/deploy-clients-to-windows-computers>QUESTION 106You have a deployment of System Center Configuration Manager (Current Branch).You need to recommend a solution to manage and reduce the attack surface of applications used in your environment.What should you include in the recommendation?A. Windows Defender Exploit GuardB. antimalware policiesC. Windows Defender Advanced Threat Protection (ATP) policiesD. compliance policiesAnswer: AExplanation: <https://cloudblogs.microsoft.com/microsoftsecure/2017/10/23/windows-defender-exploit-guard-reduce-the-attack-surface-again-next-generation-malware/>!!!RECOMMEND!!!1.|2019 Latest 70-703 Exam Dumps (VCE & PDF) 134Q&As Instant Download:<https://www.braindump2go.com/70-703.html>2.|2019 Latest 70-703 Study Guide Video Instant Download: YouTube Video: [YouTube.com/watch?v=bg6h8S51rk0](https://www.youtube.com/watch?v=bg6h8S51rk0)
