Case Study 7 - Line-of-business applications (Question 188 - Question 193)Business RequirementsLine-of-business applicationsA line-of-business (LOB) application named App1 is deployed on LA-SVR01 and LA-SVR02.BackupsAll company data is temporarily backed up by using snapshots, and then archived to long-term media. When possible, metadata and non-critical information must be stored by using AD DS.MonitoringSystem Center is used as the primary monitoring tool for server and application performance.The company also plans to monitor core services, such as DNS, DHCP, and AD DS. Any additional monitoring capabilities must be performed by using System Center.Active DirectoryThe company plans to use Active Directory to store personal information for employees. Users in the branch offices must not be able to view the confidential data that is stored for other users.File sharesThe NY-SVR05 server acts as the primary file server in the domain. File shares are replicated to LA- SRV03. Client computers use NY-SRV05 to access file in the file share, BranchCache distributed mode is enabled in each branch office. Each client computer has a 250-GB hard drive that is used by the Local Cache. BranchCache must be able to use up to 10% of the 250-GB hard drive for the local cache.ConsolidationThe company plans to consolidate the amount of servers that are in both data centers.Company management needs to generate a report that describes how consolidation will affect power and cooling costs in the data center.Technical RequirementsServer deploymentsThe existing Microsoft Azure environment does not have the ability to expand automatically.The Azure environment must support the ability to deploy additional virtual machines (VMs) automatically. The on- premises deployment environments must deploy only to trusted computers. When possible, System Center must be used to deploy and manage the on-premises and Azure environments. System Center must also be used to migrate existing virtual machines from VMM to Azure.MonitoringThe DHCP service must be monitored and reported if the service stops or restarts. Additionally, DHCP scope and Network Access Protection (NAP) related events must be monitored.Azure migrationThe company plans to migrate existing services, including System Center management servers, to Azure. To reduce costs, the migration must use the minimum number of Azure VM instances to migrate the services.App1App1 uses a DNS application directory partition on LA-DC01 and NY-DC01. App1 uses IPv6 for network connectivity and must resolve single-label names for resources in the woodgrovebank.com DNS zone. GlobalNames zone has been created, but the zone has not been populated with resource records. Active Directory Domain ServicesThe company plans to use the Employee-Number user property to store personal identification numbers.File sharesEach branch office connects to the New York data center to retrieve file shares. BranchCache distributed mode is enabled in each branch office. The cache on each client computer must be a single file.Consolidation reportsThe company requires a report that describes the impact of consolidation.The report must provide the following information:- An inventory of the existing physical server environment- Visual charts that show the reduction of physical servers QUESTION 192You need to implement the Microsoft Azure migration plan. What should you do? A. On Microsoft Azure, install and configure System Center 2012 R2 Virtual Machine Manager.B. On an on-premises server, install and configure System Center 2012 R2 Service Manager.C. On an on-premises server, install and configure System Center 2012 R2 App Controller.D. On an on-premises server, install and configure Windows Deployment Services.E. On Microsoft Azure, install and configure System Center 2012 R2 Orchestrator. Answer: CExplanation:* Scenario: Azure migrationThe company plans to migrate existing services, including System Center management servers, to Azure.To reduce costs, the migration must use the minimum number of Azure VM instances to migrate the services. QUESTION 193Hotspot QuestionYou need to protect the personal data of employees.What should you do? To answer, select the appropriate options in the answer area.

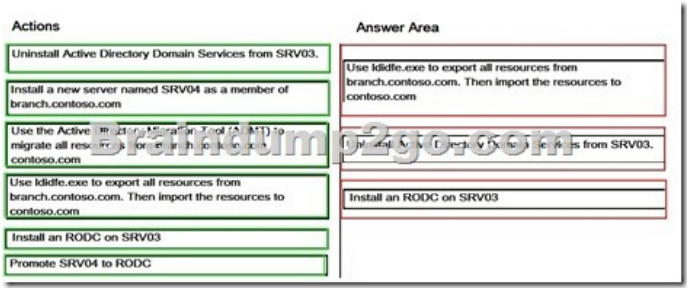

Answer:

Explanation:Scenario:Active DirectoryThe company plans to use Active Directory to store personal information for employees. Users in the branch offices must not be able to view the confidential data that is stored for other users.Active Directory Domain ServicesThe company plans to use the Employee-Number user property to store personal identification numbers. QUESTION 197 Drag and Drop QuestionYou manage an Active Directory Domain Services forest that contains a root domain named contoso.com and a child domain named branch.contoso.com. You have three servers named SRV01, SRV02, and SRV03. All servers run Windows Server 2012 R2. SRV01 and SRV02 are domain controllers for the domain contoso.com. SRV03 is the domain controller for branch.contoso.com. User accounts and resources exist in both domains. All resources in branch.contoso.com are physically located in a remote branch office.The remote branch office must be configured as Read-Only Domain Controller (RODC). The solution must minimize the impact on users and the number of servers deployed in the branch office.You need to configure the environment.Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

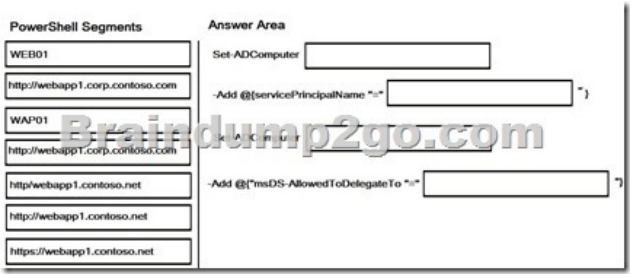

Answer:

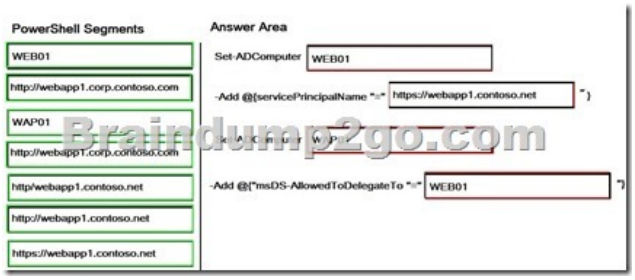

QUESTION 198Drag and Drop QuestionYou manage a server named WAP01 that has the Web Application Proxy feature deployed. You deploy a web application named WebApp1 to a server named WEB01. WAP01 and WEB01 both run Microsoft

Windows Server 2012 R2 and are members of the Active Directory Domain Services (AD DS) domain named corp.contoso.com. You have the following requirements:- WebApp1 must be available internally at URL https://webappl.corp.contoso.com by using Kerberos authentication.- WebApp1 must be available externally at URL https://webappl.contoso.net by using Active Directory Federation Services (AD FS) authentication.You need to configure computer accounts.How should you complete the relevant Windows PowerShell commands? To answer, drag the appropriate Windows PowerShell segment to the correct location. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Braindump2go Promise All 70-413 Questions and Answers are the Latest Updated,we aim to provide latest and guaranteed questions for all certifications.You just need to be braved in trying then we will help you arrange all left things! 100% Pass All Exams you want Or Full Money Back! Do yo want to have a try on passing 70-413?
